## NC05 LAT PULL DOWN

# THE KEY POINTS OF TANNAC RANGE

## DURABILITY

Mechano-welded frame with 3,2 mm tubes, steel rear stack guard, hauling straps at very high strength. TANNAC machines are designed for intensive use.

## STRENGTH

TANNAC machines, like all our ranges, are the result of our knowledge developed in high performance sport. They respond to high requirements in terms of biomechanics. Loads are adjustable to match the most demanding user's needs.

## CHOICE

Optional frame colour (grey as standard), upholstery (standard black), logo embroidery are available

# KEY POINTS

## NC05 – LAT PULL DOWN

### ADJUSTABLE STARTING HEIGHT

The height of the stem of NC05 is adjustable (9 positions) in order to choose the starting position according to one's size and the kind of exercise. The large grip bar is removable and offers a perfect grip

### ADJUSTABLE KNEE PAD

In order to fit to all bodies and all practices, the NC05 is equipped with adjustable knee-pads (7 positions) guaranteeing optimum stability and easy access to the machine.

### REPOSE-PIEDS

The non-skid footrest provides safety to the user. This material offers total grip, allowing maximum focus on the movement in complete serenity.

# TECHNICAL DATA

CHARACTERISTICS	DESCRIPTION
Length	120 cm
Width	145 cm
Height	240 cm
Weight	250 kg
Standard load	80 kg
Maxi. load	140 kg
Adjustable starting height	9 positions
Knee pad adjustment	7 positions
Maxi user weight	150 kg
Frame	Oval steel frame - 3,5mm/average
Stack guard	Rear
Upholstery	Black (other colours optional)
Load transmission	High resistance belting (4,5 tonnes)
Warranty	5 years on metal frame (excl. paint, upholstery and parts subject to wear)

STANDARD FRAME COLOUR	OPTIONAL FRAME COLOUR

# KNOW-HOW

## WELDING

At the forefront of technology, we have a semi-automatic eight-axis welding robot. Its size and quality allow us to assemble all the sub-assemblies of the machines and ensure real quality.

The more specific parts are welded by an experienced team and then individually controlled.

## PAINT

During the painting phase, our painters follow three key steps. Initially, they clean the parts apply a layer of antirust and protection. Then, paint is added by this process offers outstanding aesthetic quality as well as mechanical resistance electrostatic powdering.

## ENVIRONMENTAL PROTECTION

We use recyclable 90% products. Our chassis are made of 100% steel and delivered by Austrian suppliers WUPPERMANN which guarantees character “infinitely recyclable of its steels” by encouraging the use of steel from the electrical industry to reduce its carbon footprint.

## EN957 STANDARDS

All LAROQ machines are designed and manufactured according to the EN957 standards. They have been approved by an independent organization, COFRAC accredited. Tests are performed in the most demanding conditions (maximum displacement area, maximum stress, stability )

# CUSTOMIZATION

## EMBROIDERY

Made in France, we are able to customize your upholstery with your own embroidered paint. The ability to customize frame colors, upholstery colors, marking... you can completely customize your equipment.

## SADDLERIES AND COLOR

The seats and cushions are entirely cut and hand-sewn in our upholstery workshop. We select the best manufacturers of natural or synthetic leathers to offer a wide range of colors and textures.

We place great importance on the quality of materials used in manufacturing and the details.
